PROFESSIONAL EXPERIENCE

GOVTECH, National Digital Identity (NDI)

Software Engineer

12/2017 - Present

- Designed and developed SafeEntry for National use. There are over 10 million of API calls daily.
- Designed and developed MyInfo API for Singapore organizations to consume. There are currently more than 200 e-services and over 10 million active API calls every month.
- Implemented E2E from CI/CD pipeline to API endpoint using Terraform and Serverless Framework (IaC).
- Developed AngularJS Web Application using Docker container.
- Collaborated with Senior Product Managers and developers through agile and scrum methodologies.
- Managed and heavily involved in the development of MyInfo Developer Portal using AngularJS and Nodejs.
- Improved quality of life of millions of Singaporeans by allowing them to pre-fill online forms with government verified data.

GOVTECH, PMD

Software Engineering Intern

07/2017 – 12/2017

- Consumed and integrated data on every single company in Singapore via ACRA using Qlik Sense.
- Analysed company data and create visualization sheets using data from different entities to help them tackle issues such as skillset segmentation and optimization of hiring process.
- Involved in vendor management process and communicated with them extensively to gain a deeper insight on the data gathering requirements.

Certificates

- AWS Certified Developers Associate
- AWS Certified Solution Architect Associate
- NICF - Certified ScrumMaster (SF)
- Oracle Database SQL Certified Expert Certification
